

**CENTRALITY
IN THE AGE OF
DISPERSION**

Wrocław University
of Science and Technology

2nd CALL FOR PAPERS

*What is special about centrality
and dispersion today?*

*What is the current centrality/dispersion balance
in urban development?*

How does urban governance respond to those complex phenomena?

These are the main questions raised by the International Conference Centrality in the Age of Dispersion organized by the Chair of Urban Planning and Spatial Management, Faculty of Architecture, Wrocław University of Science and Technology, Wrocław, Poland.

The conference calls for a new approach in spatial planning and gathers experts from various scientific disciplines to present their research on urban centres and discuss the possible solutions to the current development issues.
